

Testing Your Way!

Save money and take an active role in your care.

Patient-Directed Testing is offered as a wellness and personal health management tool, providing convenient and often less expensive testing.

Patient-Directed Testing:

■ Does not require a doctor's order.

Order forms can be completed at the time of registration or in advance (for laboratory testing only) by visiting WayneHealthCare.org/Testing.

■ Allows patients to take control of their healthcare.

Services are similar to a health fair and are available at a discounted price.

■ Results are mailed directly to the patient.

It is highly recommended that patients share and discuss their results with their primary care provider.

Hours and Scheduling

PATIENT-DIRECTED TESTING

Laboratory Tests and EKGs

APPOINTMENT NOT REQUIRED

Monday - Friday | 7:00 am to 5:00 pm
Saturday | 7:00 am to Noon

Vascular Screening, Osteoporosis Screening, 3D/4D Ultrasounds and Mammography

APPOINTMENT REQUIRED

Monday - Friday | 7:00 am to 5:00 pm

Call (937) 547-5715
to schedule an appointment.

Testing Your Way!

PATIENT-DIRECTED TESTING

Outpatient tests and screenings
without a doctor's order.

Laboratory Tests

APPOINTMENT NOT REQUIRED

Wellness Panel: \$50

Used to measure overall health and wellness, the panel includes 14 chemistry tests to check kidney function, liver function, blood sugar level, and protein levels. A Lipid Panel (cholesterol, HDL, LDL and triglycerides) is also included. **An 8 to 12 hour fast is required.**

Vitamin D: \$45

A test to screen for Vitamin D deficiency. Adequate Vitamin D levels play an integral role in bone health and decreasing the risks for colorectal cancer, breast cancer and autoimmune disease.

Prostate Specific Antigen (PSA): \$40

A screening test for early detection of prostate cancer. This test should be performed in conjunction with a clinical evaluation by your physician.

Thyroid Panel (TSH/FT4): \$45

Tests to evaluate thyroid function and screen for thyroid disease.

Liver Panel: \$30

A test to evaluate hepatic function, which can be affected by medications, alcohol use, cirrhosis, hepatitis, and other diseases. **Included in Wellness Panel.**

Urine Pregnancy: \$15

A screen to confirm pregnancy.

Hemoglobin A1c: \$25

A test used to assess glucose levels in diabetics. A1c is frequently used in conjunction with glucose fasting to diagnose diabetes.

Iron: \$15

A screening test for anemia and other iron disorders.

COVID-19 Rapid PCR: \$100

This test detects genetic material of the virus using a lab technique called polymerase chain reaction (PCR).

COVID-19 IgG Antibody: \$65

This test checks for antibodies to COVID-19. These antibodies indicate that you may have had COVID-19 in the recent past.

Complete Blood Count & Differential: \$25

A test to evaluate overall health and detect a wide range of hematologic disorders including anemia. This test includes white and red blood cell counts, hemoglobin, hematocrit, platelet count, and a WBC differential.

Lipid Panel: \$25

A screening test for hyperlipidemia - a risk factor for coronary artery disease and stroke. This profile includes total cholesterol, HDL, LDL and triglycerides. **An 8 to 12 hour fast is required. Included in Wellness Panel.**

Glucose Fasting: \$15

A fasting blood sugar level to screen for diabetes. **An 8 to 12 hour fast is required. Included in Wellness Panel.**

Potassium: \$15

A test to evaluate potassium levels, which can be affected by medication (especially diuretics) and many diseases. **Included in Wellness Panel.**

Basic Metabolic Panel (BMP): \$30

Eight chemistry tests to check blood sugar, electrolytes and kidney function. This panel includes glucose, BUN, creatinine, calcium, sodium, potassium, chloride and CO2. **An 8 to 12 hour fast is required. Included in Wellness Panel.**

Cholesterol: \$15

A screening test for elevated cholesterol levels, which can be a risk factor for coronary heart disease and stroke. **Included in Wellness Panel and Lipid Panel.**

Electrocardiogram

APPOINTMENT NOT REQUIRED

Electrocardiogram (EKG): \$35

A screening test to monitor the electrical activity of the heart. This test helps diagnose various heart conditions.

Diagnostic Imaging

APPOINTMENT REQUIRED

Special Pricing!

Vascular Screening Package: \$25

Discounted screenings are now possible year round, courtesy of the Wayne HealthCare Foundation, in partnership with Heart Health 5K.

Includes all three of the screenings listed below:

■ Abdominal Aorta Vascular Ultrasound

A screening test to check for the presence of an aneurysm that could lead to a ruptured aorta.

■ Carotid Vascular Ultrasound

A screening test to check for plaque buildup in the carotid arteries to help identify the risk of a stroke.

■ Peripheral Arterial Disease

A screening test that measures the circulation to your legs to help identify the risk of a heart attack or stroke.

Osteoporosis Screening:

For men and women age 35 and above. **Radiologist fee is additional.**

■ DEXA (Bone Density) Exam: \$461

A screening test that measures bone density and the patient's risk of breaking a bone.

■ DEXA with VFA: \$563

In addition to the DEXA exam, Vertebral Fracture Assessment (VFA) shows existing spine fractures to determine if more aggressive treatment is required.

3D/4D Ultrasound: \$99

For mothers 26-36 weeks. Includes a CD of images, video of baby, audio of heartbeat and a keepsake.

Mammography Screening: \$238

For women age 40 and older who are asymptomatic. Includes 3D Tomosynthesis and Mammography Screening with CAD (computer-aided detection). **Radiologist fee is additional.**
